### VERSATILITY

It's choice and customised design that we want and nothing says flexible kitchen like 160 finish options, which is what the chunky cabinetry of Cesar's Maxima 2.2 kitchen is offering. Choose from options including oak and elm in ultra-high gloss or antique effect, polished or frosted glass, ceramic, Fenix and melamine with another myriad options for worktops, handles and every detail. While it's hard to predict the exact end result, rest assured that it'll be simple, stylish and sophisticated.

### HEALTH

Wellbeing is dominating the design world, as Effe's entrance into the world of spa bathrooms testifies. The Idea sauna by Talocci Design is a compact blend of Nordic bathing tradition, with the elegance of Italian design. Crafted from slats of smooth, honey-toned Canadian hemlock timber, its simple linear form exudes a chic yet welcoming warmth.

### COMFORT

Like everyone else, Lema has put relaxation at the top of the agenda with its new seating launches. The Glee sofa is as happy as it sounds, a joyful concoction of soft forms made-to-measure to fit any space in a myriad of colour and material options. The equally cheerful Groovy sofa, pictured, is a modular melding of squashy shapes and rigidity, its arms semi-supported so they open outwards for a leisurely lounge.

### BIOPHILIA

Summoning the elegance of wood and stone, Arpa Fenix's latest surface collection is decorated with patterns or palettes found in nature as we continue to welcome the organic into every area of the home. Fifteen new made-in-Italy surfaces come in a variety of natural and neutral shades.
